Features

Multiple PoE LAN ports to support Transport Surveillance

This mobile NVR with 4 PoE ports (IEEE 802.3af) is suitable for IP Video Surveillance and real-time recording applications.

Designed for MIL-STD-810G with Extreme Vibration Resistance

LVC-5000-A Series is in compliance with MIL-STD-810G vibration and shock standards and includes SSD storage and a Suspension Kit to further improve robustness.

Fanless Design with Corrugated Aluminum

The corrugated aluminum casing lets heat dissipate through the top of the device, allowing for a fanless design.

Convenient DC output

The LVC-5000-A Series offers 12VDC output (max 1A) for external devices, operational in concert with the Ignition Power Management feature.

Vehicle Ignition Power Management

Detects vehicle ignition on/off status and allows flexible control of the delay time via software utility.

Analogue Video Grabber

The analogue solution is a high-quality, high-performance video capture device with on-board hardware H.264 compression engine can record live video from cameras into high-quality H.264 Baseline Profile files, which is specially designed for surveillance applications and supports up to 8/16 channels of video inputs and 1 channel of audio input.

Key lock for Drive Bay

The system is with key lock for removable drive bay.

Settings and Installation via the front panel

MCU setting and CF card and SIM card installation is easy to access simply by opening the front panel.

Digital I/O

The Digital I/O design includes 12V Level DI/O, audio, MCU TX/RX and also includes 2x DI (Digital Input from MCU) which can connect sensors to detect the environment. Once defined events occur, the LVC-5000 series can be turned on automatically.
